### PROJECT

- Created small console programs in C/C++ to practice logic building and basic problem-solving.
- Designed simple HTML pages to understand web structure and formatting.
- Implemented tasks using arrays, loops, and functions to improve coding skills.
- Tested and debugged programs to ensure clean and error-free output.
- Completed mini-projects that strengthened understanding of core programming concepts.

### SKILLS

- Programming Languages: C, C++, HTML
- Web Development: HTML
- Tools & Software: Canva, MS Office
- Technical Knowledge: Digital Electronics, Basic AI & ML
- Other Skills: Poster Design, Presentation Skills, Video Editing(Basics)

### SUMMARY

Proficient in programming fundamentals and GenerativeAI, with strong problem-solving and analytical skills. Skilled at creating efficient solutions and adapting quickly to new technologies.

### EDUCATION

Bachelor of Computer Engineering 2029  
MITAOE, Alandi, Pune, India (still enrolled)

Higher Secondary Certification 2025  
Dharmaveer Anand Dighe Jr. College, Shahapur, Thane, India

Central Board of Secondary Education Certification 2023  
M.N. Barora M.V. Shahapur, Thane, India

### EXPERIENCE

Applied foundational programming skills in C, C++, and HTML through academic lab work and small personal projects.

Developed simple command-line programs and basic web pages, improving coding clarity and logical thinking.

Enhanced technical knowledge by completing coursework in C and C++, gaining stronger problem-solving abilities and confidence in core programming concepts.
